# Burn Anesthesia Checklist

## Pre-Evaluation Checklist

<table>
<thead>
<tr>
<th>Post-injury day number</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Previous debridements</td>
<td></td>
</tr>
</tbody>
</table>

### Specifics of presently planned procedure

- Allo vs auto
- Type and extent of excision

### Respiratory status

- Intubated?
- Ventilator settings
- Last ABG
- CXR
- Type of direct pulmonary injury, if any

### Cardiovascular status

- MAPs
- Pressors?
- Active resuscitation ongoing?
- Present fluid/ffp rates and types

### Renal status

- Chem panel
- UOP
- Evidence of AKI/ARF?
- HD or CVVHD?
- Last time done

### Heme Status

- CBC
- Blood products ready for OR?

### Neuro Status

- Drips for sedation/paralysis?
- How much extra opiate required?
- Pt. on methadone?

### Intra-op Checklist

- Warm room
- Two fluid warmers
- Arterial line transducer
- Blood and ffp ready to go
  - Consider starting transfusions at outset of case
- Resuscitation adequate?
  - UOP
  - Frequent ABGs
  - MAPs, need for pressors
