The University of California at San Diego (UCSD) School of Medicine is pleased to announce

Multi-Disciplinary Research Fellowships in Women’s Cardiovascular Health

Sponsored by the American Heart Association.

The training experience employs a trans-disciplinary approach to the Prevention of Cardiovascular Disease in Women with a focus on Sedentary Behavior

This fellowship includes training in basic, clinical, population and translational research, as well as practical experience in prevention-based studies and career development. For example, the fellow will get experience designing, managing and conducting a randomized trial focused on reducing sedentary time among Latinas. Opportunities for leading publications related to the health disparities, sedentary behavior, and cardiovascular health will be available from early on in the training period. Of note, this fellow will be exposed to and have access to other research being conducted in the Center, to include basic and population sciences. Opportunities for international collaborations are also possible.

Training duration is 2 years.

Post-doctoral applicants must have received (or will receive by commencement of training) an advanced degree in medicine (MD) or an equivalent health sciences related doctoral (e.g. PhD) degree. Residency requirements are as follows: U.S. citizen Permanent Resident, Pending Permanent Resident, E-3 Visa, H1-B Visa, O-1 Visa, TN Visa, J-1 Visa, F-1 Visa or G-4 Visa.

Fellows receive a stipend commensurate with their level of training and other benefits. UCSD is committed to representing underserved populations in its fellowship programs.

This fellowship will focus on a randomized control trial of postmenopausal Latinas. Experience developing and delivering intervention materials in Spanish and English is preferred. Previous experience working on physical activity or sedentary behavior is desired. Previous experience working with older adults or Latino/as is desired.
